THE INSTITUTE OF MINECRAFT STUDIES JOURNAL

THE SYSTEMS Experiment

What happens when an experiment designed to foster innovation fails? *The Systems Experiment* tracks the fallout of a small population strained by outsized problems, and explores the true blueprint of civilization.

The Ordonian Calculus and the IMS - p.2

Stewardship, Agency, and the Economy of Information in The Systems Experiment

Political Philosophy Is Useless for the Study of Servers - p.23

Political philosophy can only engage in a descriptive, not normative, role in the study of communities.

Society and Governance Parallels in Minecraft - p.18

Making predictions about the future by drawing parallels with the real world

The removal of agency by server owners and reclaiming player power - p.31

A structure where players remove the need for an owner and establish a server where decisions are made by players
